

H32D Autocal

Product group	900
Crimping force in kN	2,000

With H32D AutoCal system, the machine warns you at intervals when calibration is needed and you do the calibration yourself on site. The calibration takes about 10 seconds to perform, no training required. This is just one of the innovative features of this hose press.

It also has multifunctional digital control, faster and more secure data entry, no confusing micrometers and a control panel placed on the side to create an ergonomic workplace for the operator.
